Registered Charity 1212230

Environmental Policy

Eversley Village Hall is committed to promoting environmental sustainability and reducing our impact on the environment. We recognise the importance of conserving natural resources, reducing waste, and supporting a greener community.

Energy and Water Conservation

- We use energy efficiently and strive to reduce consumption wherever possible, including keeping external doors closed during cold weather.
 - Heating is controlled via an app and monitored by a committee member to ensure responsible usage.
 - LED lighting has been installed throughout the hall, and all users are required to switch off lights and electrical equipment upon leaving.
 - Water-saving taps have been fitted to reduce water consumption.
 - We take proactive steps to prevent water wastage by regularly checking for leaks and ensuring prompt repairs.
-

Waste Reduction and Recycling

- We encourage all hall users to recycle and minimise waste, including reducing unnecessary packaging and single-use plastics.
 - Reusable materials and sustainable alternatives are promoted wherever possible.
-

Natural Environment and Sustainable Travel

- We are committed to maintaining and enhancing the green spaces surrounding the hall.
- Wherever possible, we support local businesses and provide them with opportunities to quote for work.

- We aim to minimise the environmental impact of our activities, including reducing traffic, noise, and general disturbance to the local area.
-

This policy will be reviewed regularly to ensure we continue to improve our environmental practices and reduce our carbon footprint.

Policy Review and Approval

This policy will be reviewed annually by the Management Committee or sooner if legal or operational changes occur.

Approved by: Eversley Village Hall Management Committee
Date: March 17th 2026
